

ISSN 0104-6497

A stylized, high-contrast illustration of a nauplius larva, a common early developmental stage of many aquatic invertebrates. The larva is depicted in white and light blue against a dark blue background. It has a central body with three pairs of long, segmented appendages extending outwards and upwards. The overall appearance is that of a delicate, branching structure.

THE JOURNAL OF THE BRAZILIAN CRUSTACEAN SOCIETY

Aims and Scope

The *Nauplius* publishes original articles based on research in any aspect of crustacean biology, including taxonomy, phylogeny, morphology, development, physiology, ecology, biogeography, bioenergetics, aquaculture and fisheries biology. Review articles with bold proposals showing original conclusions or approaches are encouraged.

The manuscripts submitted to this journal must have not been submitted to another periodical. Reproduction of articles published in the *Nauplius* is forbidden without previous written authorization by the Editorial Board of this periodical.

Instructions for the preparation of manuscripts are located on the inside back cover.

Manuscripts should be submitted to the Editor of *Nauplius*:
